Welcome to Atlanta Smiles!

At Atlanta Smiles, we believe every patient deserves a healthy and beautiful smile. We focus on general and cosmetic dentistry as well as overall health and wellness.

Our experienced and highly-trained general and cosmetic dentists, Dr. Giesler and Dr. Kovitch, head the Atlanta Smiles, dental team. Patients throughout the Atlanta area choose Atlanta Smiles for our expertise, excellent results, and compassionate care.

Our dental team views comprehensive dentistry as a life-long commitment to your health, appearance, and self-image. Our care continuum includes a focus on cosmetic dentistry backed by our expertise in dental health and treatment.

We offer a range of services supported by our team of highly skilled professionals. We work with each patient to develop the best treatment plan to restore your smile and achieve your cosmetic and health goals. We are passionate about enhancing your beautiful smile.

Every aspect of our dental practice delivers the highest quality of professional care and state-of-the-art dentistry, emphasizing your wellbeing and personal needs. We are happy you are here and grateful to walk beside you on the journey to health, beauty, and confidence.

Cosmodontics Delivers Your Dream Smile

Achieve the beautiful smile you deserve with innovative solutions from Atlanta Smiles. Dr. Giesler developed cosmodontics to enhance the approach to cosmetic dentistry with innovative and integrated dental treatments.

You may feel it's too late to correct crowded, crooked, or misaligned teeth as an adult. You may not want to endure the negative cosmetic impact of wearing braces for an extended period. Plus, you may desire a solution tailored to your specific issues, like discoloration, misshapen teeth, or crowding.

Atlanta Smiles has an option for adult patients to gain the confidence of a beautiful smile without the embarrassment of full braces. Cosmodontics combines cosmetic dentistry and orthodontics to straighten, whiten, and repair teeth. The outcome is a beautiful and confident smile using a process that maintains patient dignity.

What is Cosmodontics?

Cosmodontics is Atlanta Smile's approach to smile design. We offer customized solutions to meet our patients' aesthetic goals. In addition, Cosmodontics sets us apart by creating orthodontic solutions that include the innovations of cosmetic dentistry.

The typical cosmodontic solution addresses orthodontic issues for adults by using veneers on the top teeth and braces on the bottom teeth. The veneers quickly correct the visible top teeth, while clear aligners or braces adjust the bottom teeth more slowly.

Cosmodontics gives patients various options to correct and repair teeth. Our dentists provide their expert advice on the best treatment plan to help you make an informed decision.

The Benefits of Cosmodontic Treatment

Today's comprehensive cosmetic dentistry solutions empower patients to custom design the smile they desire. Cosmodontics thinks outside the traditional approach to combine the benefits of orthodontics and cosmetic dentistry. Patients don't need to choose between solutions. Instead, you decide the best treatment options to fit your lifestyle, aesthetic goals, and budget.

- ❖ Customized cosmetic solutions
- ❖ Correct discolored, damaged, or misaligned teeth
- ❖ Straighten crowded or crooked teeth
- ❖ Combine with other procedures like extractions to create more room for teeth placement
- ❖ Gain confidence and an enhanced smile

When you select Atlanta Smiles as your dental partner, you benefit from our team's vast knowledge of cosmetic and traditional dental treatments. We're committed to delivering both healthy teeth and a beautiful smile.

What's Included in A Cosmodontic Treatment Plan?

Cosmodontic treatment plans include a combination of procedures customized to your specific needs. The two most common elements include veneers and clear aligners. This combined approach allows patients to resolve multiple issues with one treatment plan.

Veneers

Porcelain veneers are thin, custom-designed shells resembling natural teeth that permanently cover your existing teeth. Our Atlanta Smiles team carefully crafts each veneer to your tooth's specifications.

When combining veneers and aligners or braces, most patients choose to bond the veneers to the surface of the top teeth. Patients can receive a single veneer to correct an isolated issue, like a chipped tooth. Or, patients may choose to correct multiple or all front teeth with veneers.

Traditional veneers give dental patients a versatile and straightforward solution to improve the look of your smile. Designing and applying porcelain veneers requires the experience and technical detail mastered by the Atlanta Smiles dental team.

Clear Aligners

Clear aligners offer an alternative orthodontic treatment to traditional braces. Clear aligners use clear plastic trays that fit over teeth to straighten teeth by slowly moving them into position. Atlanta Smiles offers clear aligners as a standalone or as part of a cosmetic treatment plan.

The aligners work effectively and provide a more aesthetically appealing option than traditional braces. The trays are removable and comfortable to wear. The patient wears one tray at a time until all the teeth move into place to achieve the cosmetic and oral health goals.

Braces

Either traditional or lingual braces offer other options to straighten the bottom teeth. If the patients select braces instead of clear aligners, we refer the patient to a trusted orthodontist.

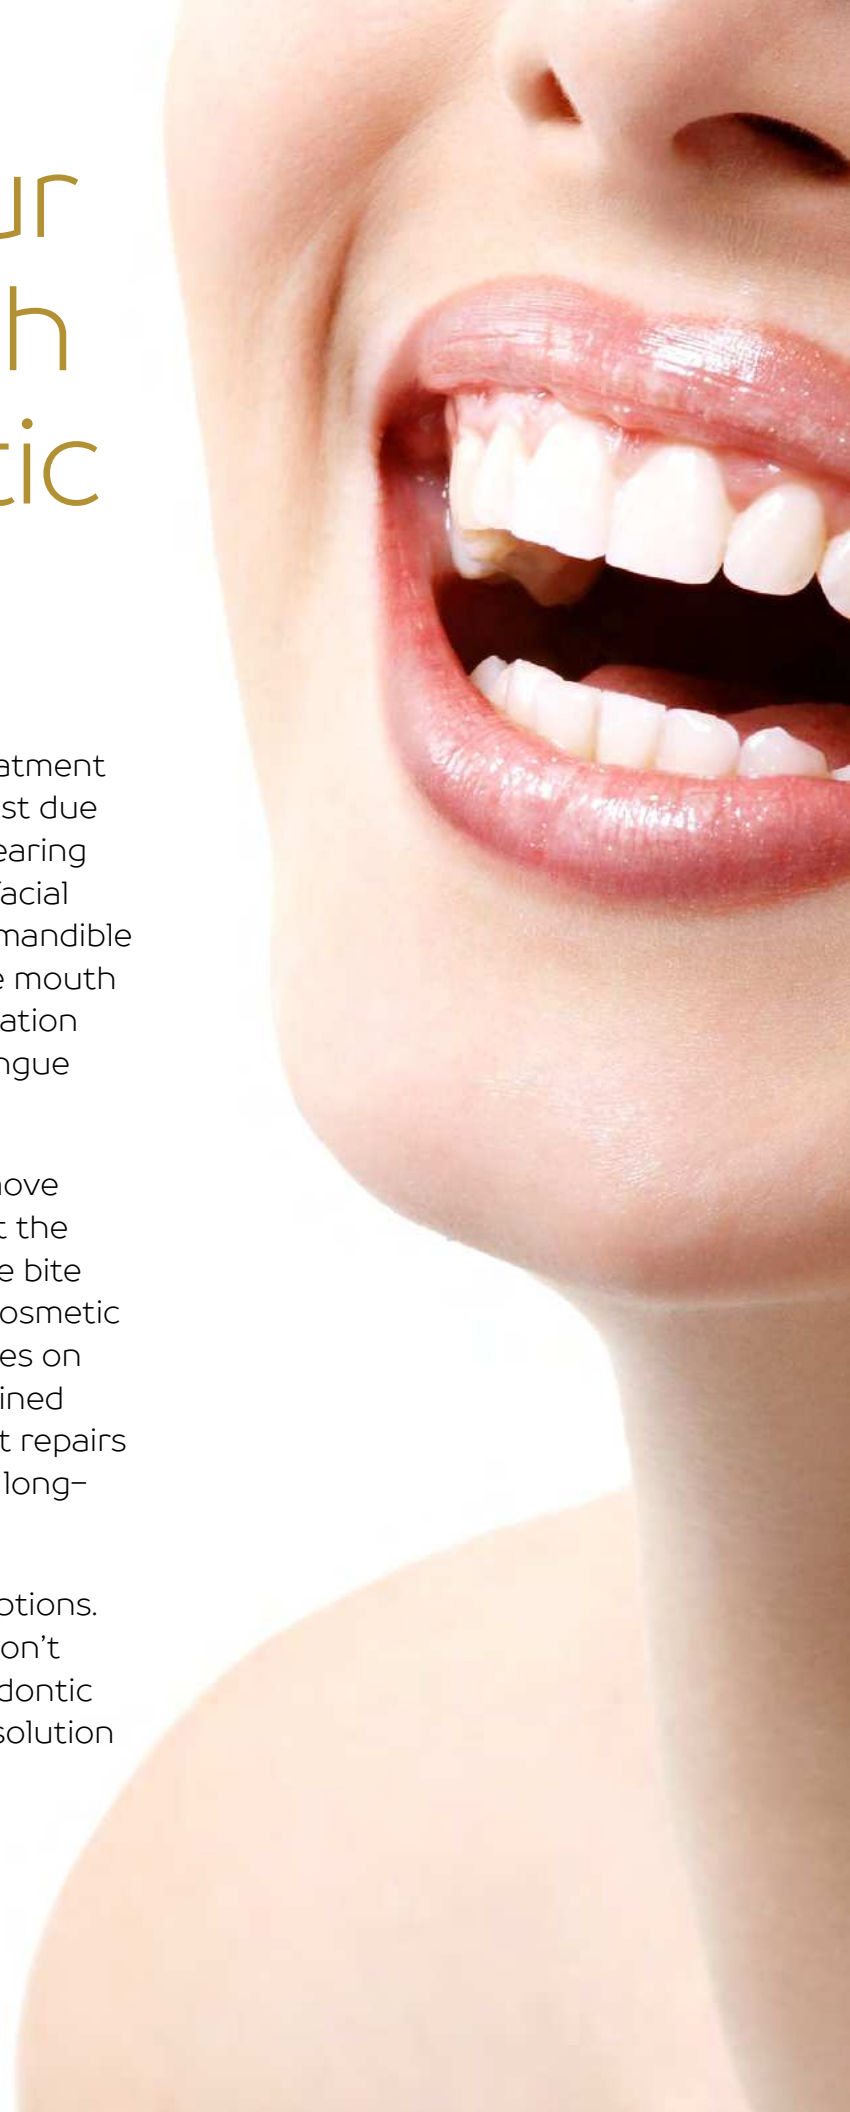

Traditional metal braces connect to the front side of the teeth, while lingual braces connect on the backside of the teeth. For more complex orthodontic issues, clear aligners may not offer the best solution. Our team works with you to determine the suitable recommendation to achieve your aesthetic goals.

Expand Your Options with Cosmodontic Dentistry

Many adult patients had orthodontic treatment as a child or teen, but the results didn't last due to tooth movement. When adults stop wearing a retainer, the aging process causes the facial bones to move. Plus, the maxilla and the mandible decrease in arch length, which means the mouth gets smaller. The smaller space in combination with the functional movements of the tongue leads the teeth to shift.

Using a cosmodontic approach, we can move and straighten the anterior teeth without the extensive orthodontic work to change the bite or occlusion. Adult patients achieve the cosmetic results they want more quickly with braces on a few teeth or clear aligners. When combined with veneers on the top teeth, the patient repairs several smile issues without the need for long-term orthodontic treatment.

Cosmodontics gives patients expanded options. You don't have to settle for a smile you don't love. Whether you've had previous orthodontic treatment or not, we have a customized solution to meet your smile goals.

Who Is a Good Candidate for Cosmodontics?

A cosmodontic approach typically works best for adult patients in good health. We evaluate each patient to determine if this multifaceted approach offers the right solution for your health, aesthetic goals, and budget.

If you want to improve your smile and gain confidence, contact Atlanta Smiles to discuss whether cosmodontics is right for you.

What is the Cost of Cosmodontics?

We offer customized treatment plans for each patient. Cosmodontics is an approach to cosmetic dentistry that can include several types of treatments. As such, the cost varies considerably based on the specific treatments included in the plan.

We provide a consultation and cost estimate for each patient before moving forward with treatment. Contact us today to schedule a consultation.

Is Cosmodontics Right for You?

Are you ready to take the next step to build confidence through cosmetic dental care? The Atlanta Smiles approach to smile design starts with cosmodontics. We offer excellent care crafted to your unique needs.

We use veneers and clear aligners to redesign your teeth and enhance the appearance of your smile. Most healthy adult patients experience outstanding results with cosmodontics.

**If you feel unhappy or insecure about your smile,
ask us how our innovative dental solutions can work for you.**

Innovative Smile Design from Atlanta Smiles
